

CULINARY KIDS ACADEMY

We help students learn to **cook** while tapping into and honing their incredible **academic** potential!

After-School Enrichment:

Culinary Kids Academy is proud to bring its highly acclaimed program to PRCS! Educator conceived, CKA teaches its unique workshops to tens of thousands of students yearly, integrating math, science, history, safety, hygiene and nutrition into complex cooking lessons! Students are experientially engaged during this fun and empowering class as they make delicious recipes, while also acquiring tools that help them in both school and life! CKA also offers our take

on Food Network's competition cooking show, "CHOPPED!" where students take the lessons they've learned and creatively and independently apply them, building improvisational problem solving and teamwork skills. CHOPPED! develops age appropriate skills geared specifically for our young chefs! Give your children the self-esteem and independence building opportunity to cook REAL food and learn valuable facts, ALL WHILE HAVING A BLAST!
